Wheat Straw Plastic

Wheat straw plastic is a type of bioplastic derived from by-products of wheat harvesting. It is considered a more environmentally friendly alternative to traditional petroleum-based plastics because it utilizes a renewable resource that would otherwise be discarded or burned. Our new EarthTrendz speaker and earbuds are created using a combination of Wheat Straw and ASB Plastic, for a reduction in petroleum based plastic, as well as a lighter weight final product.

FI 210

EarthTrendz™ Wheat Straw & Bamboo Earbuds & Case

Constructed using eco-friendly materials including wheat straw and bamboo. Wireless earbuds housed in a 200 mAh recharger case. Up to 3 hours of play/talk time and 80 hours of standby time. Includes Type-C USB charging cable. Operating range 33ft/10m. Connect via V 5.1.

Recycled Stainless

Our popular SV101PR is now made of recycled Stainles Steel. Using recycled Stainless versus using virgin materials conserves energy and waste associated with the mining of raw materials. Plus, Stainless Steel is highly recyclable, and the recycling process can be repeated multiple times without significant loss of quality.
