GO GREEN

ECO FRIENDLY IS NOT A PASSING TREND!

#NoMoCello - We no longer cello pack our umbrellas. Exterior packaging gets tossed anyway. Reduce waste!

The boxes we ship in? All made from **recycled cardboard!**

Our top selling umbrellas and bags are now made from **recycled plastic** and other sustainable and recycled materials.

Sustainable doesn't have to mean recycled or recyclable. Sustainable means something that will last! Better quality products are less likely to end up in landfills. Our products are designed to stick around and protect the recipient from rain or sun for years to come.

SUSTAINABILITY IS A JOURNEY, NOT A DESTINATION...

• our impact

We're not chasing short-term fixes; we're finding long-term solutions for meaningful progress towards our goals.

For nearly 100 years, We've been providing people protection from the elements under the canopies of our award-winning umbrellas.

As times have changed, so have the needs of our customers. Part of our journey has been to evolve and adapt to best serve the people who matter most while still maintaining the family-owned, customer-focused, and employee-oriented values that define us.

EcoVadis Bronze:

Awarded for our dedication to ethical and sustainable business practices.

Factory Compliance:

Regular SMETA 4-Pillar and HIGG audits ensure adherence to labor, ethical, and environmental standards.

Reduced Packaging Waste:

Transitioned to recycled material cartons, cutting down plastic use and environmental impact.

Efficient Waste Management:

Partnered with experts to handle production waste, hazardous materials, and recycling processes effectively.

Carbon Reduction Goals:

Tracking Scope 2 emissions and working towards measurable carbon reduction targets. (QR code for details).

Innovative Materials:

Expanded sustainable offerings with ocean-bound recycled plastics and FSC-certified wood and bamboo. Transitioning all cartons and hangtags to FSC-certified paper.

SAVE

GIVING BACK

As part of our commitment to environmental stewardship, we allocate 1% of the net proceeds of each RPET umbrella sale towards purchasing verified Gold Standard carbon credits. Gold Standard carbon credits are among the most trusted in the industry. Each project is rigorously verified to ensure genuine and measurable reductions in greenhouse gas emissions. <https://www.goldstandard.org/>

WHY RECYCLED OCEAN-BOUND PLASTIC?

THIS TYPE OF PLASTIC IS TYPICALLY FOUND WITHIN 50 KILOMETERS (ABOUT 31 MILES) OF COASTLINES IN REGIONS THAT LACK PROPER WASTE MANAGEMENT SYSTEMS. THE GOAL OF RECYCLING OCEAN-BOUND PLASTIC IS TO PREVENT IT FROM BECOMING MARINE DEBRIS, WHICH WOULD CONTRIBUTE TO OCEAN POLLUTION. WASTE2GEAR'S BAGS NOT ONLY SUPPORT OCEAN CLEANUP EFFORTS BUT ALSO PROMOTE ECO-FRIENDLY PRACTICES.

WHAT IS RPET?

RPET fabric or recycled polyethylene terephthalate is an emerging reusable and sustainable material. Before it was recycled, PET (polyethylene terephthalate) was commonly known as polyester. This can include pre or post-consumption waste.

Did you

Bamboo is one of the world's fastest growing plants and is able to reach full size in just a few years. Wood is a plentiful, renewable resource with many amazing characteristics. This plant is both earth-friendly and durable. Those who want to get high-quality outdoor furniture sometimes mistaken for plastic. It grows to three feet per day which allows it to reach full size, unlike trees.

Outdoor.

ou know?

World's most prolific and fastest-growing plant with maturity in about four years. Bamboo is sustainable, renewable, and a natural product with many uses. As the world's fastest-growing plant, bamboo is eco-friendly and extremely useful for those seeking quality products. Although bamboo is often mistaken for a tree, it's actually a grass. It can grow up to 30 feet tall, which means it only takes about four years to reach maturity, whereas trees can take up to 30 years to grow.
